

A New Standard in Data Resilience

VEEAM DATA PLATFORM

Veeam Data Platform moves enterprises beyond backup entirely, delivering a new standard for data resilience built on security, storage, portability, and the confidence to recover in any scenario. It's your data on your terms.

- **Unified Resilience and Security:** One platform, best-in-class security, AI threat detection, unmatched visibility.
- **Freedom to Choose:** Software-defined, across on-premises and multi-cloud, universal licensing. No vendor lock-in.
- **Clean and Fast Recovery, Guaranteed:** Automated, tested recovery that restores workloads in minutes, every time.

The stakes are higher than ever, and most protection strategies haven't kept up. Downtime erodes customer trust, multi-cloud creates fragmented runbooks, and responsibilities continue to outpace headcount. Veeam Data Platform delivers a new standard for data resilience built for today's threats and complexity. With built-in security, unified operations, automated updates, hardened repositories, and true multicloud portability to eliminate lock-in, Veeam helps you recover with confidence when it matters most.

#1

in Data Resilience

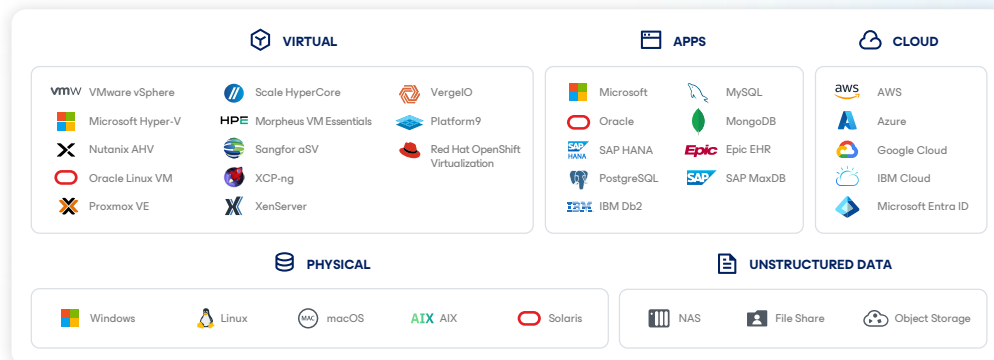

YOUR WORKLOADS ANYTIME, ANYWHERE.

Veeam is here to help you stay safe, recover anywhere, and assist in migrating workloads, all in one single solution.

Veeam Universal Licensing travels with your workloads, so your protection strategy flexes as your infrastructure evolves, without migration penalties or forced architecture changes.

VEEAM DATA PLATFORM

Secure Backup & Fast Recovery • Proactive Observability & AI • Clean Orchestration & Compliance

VEEAM DATA CLOUD VAULT

Secure, Immutable Cloud Storage

ENHANCED CAPABILITIES

Workload Mobility

Move workloads and data freely across hypervisors, clouds, and storage, from a single file to a full server, with zero lock-in.

Threat Detection & Response

Scan at backup and restore, letting the security tools you already run trigger triage and response when a threat is flagged.

Multicloud Protection

Unify on-prem and cloud protection in one platform with portable backups you can store wherever needed.

Data Sovereignty

Keep backup data inside jurisdictional boundaries with policy-enforced control and sovereign in-region VCSP partners.

Governance, Risk, and Compliance

Automate immutability, retention, and DR testing with audit-ready reporting, so compliance doesn't depend on memory.

Disaster Recovery to Cloud

Recover to the cloud from day one with a self-describing, portable format with no dedicated DR site to build or maintain.

ABOUT VEEAM

Veeam is the Data and AI Trust Company, specializing in helping organizations ensure their data and AI are fully understood, secured, and resilient to enable the acceleration of safe AI at scale. As the market leader in both data resilience and data security posture management, Veeam is built for the convergence of identity, data, security, and AI risk.
