KYBER MARSLOQ

MARSLOQ ENTERPRISE:

Advanced Log Management & AI/ML Operation Platform

MARSLOQ is the next-generation, AI-driven log analytics platform, built for the enterprise to ingest, normalize, and secure data at scale. Achieve real-time visibility, proactive anomaly detection, and automated root-cause analysis.

CORE CAPABILITIES

UNIFIED LOG MANAGEMENT
Multi-source ingestion, normalization, storage

AI-DRIVEN OPERATIONS
ML anomaly detection, predictive failure alerts, and automated responses

REAL-TIME OBSERVABILITY
Sub-second visibility, custom dashboards, full infrastructure / app stack coverage

SECURE-BY-DESIGN
Replacing M.Ops, Fops for better general enterprise focus, with encryption, RBAC, compliance

KYBER MARSLOQ

MARSLOQ ENTERPRISE:

TECHNICAL SPECIFICATIONS & ENTERPRISE USE CASES

EPS / INGESTION RATE (Last 24 Hours)

Real-time scaling and performance tracking metrics.

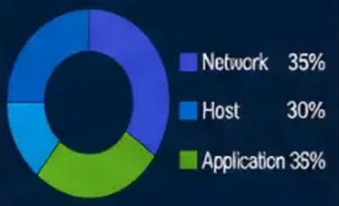

- Timeline (X-Axis): 10:00 | 14:00 | 18:00 | 22:00 | 02:00
- Volume Scale (Y-Axis): Supports scaling up to 10M EPS

SEVERITY & SOURCE DISTRIBUTION

Severity Levels

Source Distribution

DETAILED TECHNICAL SPECIFICATIONS

Supported Sources
High-velocity networks, distributed system logs, applications, application layers, and native endpoint agents.

Data Retention Policies
Flexible and hot/warm/cold automated tiered archiving policies designed for strict industry compliance.

Advanced Search Capabilities
Sub-second query responses across petabytes.

High Availability (HA) Architecture
Built-in redundancy and system fault tolerance.

Deployment Flexibility
Supports On-premise, Hybrid, or Multi-site deployments.

ENTERPRISE USE CASES

Internal Infrastructure Monitoring
Monitor on-premise infrastructure, servers, databases, and applications for performance and availability.

Threat Hunting & Security Analytics
Integrated SIEM-lite correlation engine for identifying advanced persistent threats (APT).

Application Performance Monitoring
Correlation of distributed execution traces with error logs to pinpoint system latency.

Compliance Reporting
Automated tracking and reporting framework for audit, governance, and regulatory needs.

DEPLOYMENT FLEXIBILITY

ON-PREMISE
Data sovereignty and control

HYBRID
Seamless integration and workload balance

MULTI-SITE
Centralized visibility across locations

MARSLOQ VIEWER TOOL

Powerful standalone desktop application for offline log analysis. Features include Forensic Search, Timeline Analysis, Data Export (CSV/JSON), and Hash Verification (SHA-256).

DEPLOYMENT FLEXIBILITY

ON-PREMISE
Data sovereignty and control

HYBRID
Seamless integration and workload balance

MULTI-SITE
Centralized visibility across locations

KEY CAPABILITIES

Advanced Search
Full-text search with complex query support

Real-time Analytics
Instant correlation and pattern detection

Rich Dashboards
Customizable visualization and reporting

Enterprise Security
End-to-end encryption and access control

Global Scalability
Multi-region deployment support

AI-Powered Insights
Machine learning-based anomaly detection

BUSINESS BENEFITS

- ✓ Reduce Mean Time to Detection (MTTD)
- ✓ Improve Incident Response Time
- ✓ Ensure Regulatory Compliance
- ✓ Minimize Security Risks
- ✓ Optimize System Performance
- ✓ Lower Total Cost of Ownership
